

ATTACHMENT A

Remarks

In the previous Office Action, claims 11-14, 19 and 20 were allowed. These claims are presented here without amendment.

Claims 16, 18 and 21 were objected to but indicated to be allowable. Claim 16 has been rewritten in independent form and thus should be allowable, and claims 18 and 21 depend from claim 16.

Claims 15 and 17 were rejected on prior art. Claim 15 has been amended to recite a circuit module mounted on a substrate. This feature is supported, e.g., by page 7, lines 17-21 of the specification. In addition, five new dependent claims have been added which depend from amended claim 15. These claims are supported, e.g., by page 7, lines 17-21 of the specification.

Further and favorable action is respectfully solicited.
